PROFESSIONAL SUMMARY

Business professional with about 8 years of experience in corporate strategy, strategic projects, project management and business planning within a large, diversified group. Progressed from Analyst to Specialist (Manager) in the Business Development team of Expo Group — moving from analysis and business support into owning strategic projects and business-development initiatives. Works across the full cycle: market and business-case analysis, commercial development, project coordination, regulatory work and implementation, while supporting senior management on new business decisions. Combines business expertise with engineering rigor.

CORE COMPETENCIES

Strategy & Planning Corporate Strategy · Strategic Projects · Business Planning · Feasibility Studies

Projects & Operations Project Management · Business Operations · Process Improvement · Stakeholder Management

Commercial & Analytical Business Development · Commercial & Financial Analysis · Negotiation · Contract Management · AI & Generative-AI Tools

PROFESSIONAL EXPERIENCE

EXPO GROUP

Dhaka, Bangladesh

Diversified business group — logistics, aviation services, infrastructure and new ventures. Progressed through three designations:

Specialist (Manager) – Business Development

Jul 2026 – Present

Role: *Coordinates strategic projects, corporate strategy and business-planning initiatives across several business units — turning management priorities into structured plans, business cases and measurable outcomes, and supporting senior management on new business decisions.*

- Coordinating the planning and setup of Expo Group's US\$28.75 million Sitakunda ICD/CFS — a 26.66-acre off-dock logistics hub about 22 km from Chittagong Port (projected 38% IRR, ~3-year payback) — leading new-entity formation, land-acquisition coordination (20.55 acres secured) and licensing/regulatory documentation. (Ongoing, early-stage.)
- Developing ACOS (Air Cargo Operating Station), an ongoing strategic initiative — building the concept, business case and strategic proposal, and coordinating regulatory, government and stakeholder engagement and operational planning.
- Evaluating new business opportunities and preparing business cases and recommendations for senior management across the group.
- Providing ongoing commercial and operational governance of the Qatar Airways Cargo GSA to sustain performance and compliance.

Senior Analyst (Deputy Manager) – Business Development

Jul 2022 – Jun 2026

Role: *Owned and drove business-development and strategic-project workstreams — from market and financial analysis and business cases through commercial negotiation, project coordination and stakeholder management.*

- Led Expo Group's Qatar Airways Cargo GSA mandate end-to-end — from competitive bid and application through documentation, budgeting, HR planning and permit/regulatory coordination to operational launch — building a GSA portfolio generating ~BDT 12 crore (≈ US\$1 million) in annual revenue.
- Led 8+ cargo and passenger airline GSA bids and applications (including Riyadh Air, Air Asia, Delta, SolitAir, Uzbekistan Airways and Maldivian) and supported agreement governance for KLM–Air France, Etihad and Fita Air.

- Brokered a reciprocal delivery partnership between e-Courier and Aramex Bangladesh — each becoming the other's delivery partner at home and abroad.
- Coordinated strategic and infrastructure projects — budgeting, resource planning, regulatory approvals and implementation — including the Chittagong Port XY Shed LCL operation and office setup and renovation projects.
- Built financial models, business cases and sector research to support investment, partnership and management decisions.

Analyst (Assistant Manager) – Business Development

Jun 2019 – Jun 2022

Role: Provided analysis, research and coordination support for strategic, commercial and operational initiatives across several business units — building the analytical foundation for later project ownership.

- Prepared market and sector research, financial models and business cases — including a digital-media venture, an insurance-sector market study and property/asset proposals — to support management decisions.
- Designed SOPs and improved processes for an agriculture subsidiary, lifting production about 45% and cutting cost about 35%, then supported execution of the new operating model.
- Supported freight-forwarding process improvement across several business units — import-process optimization, system governance and operational-exception monitoring.
- Prepared management reports, executive presentations and early-stage business-development proposals for senior leadership.

EUCLID TECHNOLOGIES

Dhaka, Bangladesh

Senior Executive

Dec 2017 – May 2019

Role: Supply-chain and commercial role covering planning, suppliers and contracts.

- Handled demand and supply planning, inventory control, and logistics and distribution coordination.
- Managed vendors and suppliers and negotiated contracts for reliable supply and good commercial terms.

EDUCATION

Master of Business Administration (MBA)

2017

Institute of Business Administration (IBA), University of Dhaka · CGPA 3.40 / 4.00
