Dear Hiring Manager,

I am writing to express my interest in opportunities in Corporate Strategy, Strategic Projects, Business Development, Business Planning, and Project Management. With approximately eight years of professional experience, including more than seven years in a cross-functional strategy role at Expo Group, I have developed strong experience in translating business objectives into structured plans, analyzing opportunities, developing business cases, and coordinating complex initiatives through execution.

In my current role as Senior Analyst at Expo Group, I work across multiple strategic business units, supporting senior management on corporate strategy, business development, strategic projects, financial analysis, and operational initiatives. My responsibilities extend from market and sectoral research and financial modelling to project governance, budgeting, resource planning, stakeholder coordination, regulatory requirements, and implementation. This combination has allowed me to work not only on analyzing what a business should do, but also on structuring and driving the steps required to make it happen.

A key example is my involvement in the development and operationalization of the Qatar Airways Cargo GSA. I led the initiative across the project lifecycle, from competitive bidding and application through documentation, budgeting, HR planning, regulatory coordination and operational launch. The initiative subsequently developed into a business line generating approximately BDT 12 crore in annual revenue. This experience strengthened my ability to manage complex, cross-functional initiatives while balancing commercial objectives, operational requirements, timelines, and stakeholder expectations.

I am also coordinating the planning and setup of an approximately US\$28.75 million Sitakunda ICD/CFS infrastructure venture. My involvement includes project planning, new-entity formation, land-acquisition coordination, licensing and regulatory documentation, infrastructure scoping, and financial and commercial analysis. The project has required structured coordination across multiple stakeholders and disciplines, further strengthening my project governance and execution capabilities.

Beyond these flagship initiatives, I have developed financial models and business cases to support investment decisions, conducted sectoral research, prepared executive-level reports and presentations, developed business-development strategies across multiple business units, and worked on process-improvement and operational initiatives. Earlier in my career, I also gained experience in demand planning, supplier evaluation, contract negotiation, and cross-functional coordination.

I hold an MBA from the Institute of Business Administration (IBA), University of Dhaka, and a B.Sc. in Aeronautical Engineering from Military Institute of Science and Technology (MIST). This combination of management education, analytical training, and hands-on experience has shaped my approach to problem solving: understand the business objective, analyze the underlying issues, structure the solution, and work with stakeholders to execute it effectively.

I am now looking to progress into a role where I can take greater ownership of corporate strategy, strategic projects, business planning, and cross-functional initiatives. I am particularly interested in opportunities where analytical thinking, commercial judgement, project management, and execution come together to create measurable business impact.

I would welcome the opportunity to discuss how my experience and capabilities could contribute to your organization.

Sincerely,

Mohammad Abul Rahat Chowdhury
